

# READY TO MOVE YOUR BUSINESS FORWARD?

WE ARE.

## Core BackOffice Systems

**Core BackOffice Systems specializes in providing technology business consulting and creating customized software solutions that empower your organization. We've got your back office covered from desktop computer support to enterprise wide software rollouts. Our company approach encompasses all technology aspects covering strategic planning, network architecture, software, hardware and IT staffing resources. Whether you are a start up company or large corporation, Core BackOffice has the answers you're looking for.**

**Utilizing our software tools enables companies to more efficiently service their clients by changing the way you share customer and internal information. Core BackOffice customized software systems are built on Microsoft .Net technology. All of our systems are secure, rapidly deployable and distributable via the Internet as a hosted solution or installed on your site. Our engineers continuously educate themselves on the most up to date, cutting-edge technologies. Our development staff is proficient with advanced computer languages such as C#, C++, Visual Basic .NET, Java, and much more. Core BackOffice Systems is able to make these technologies surprisingly affordable for any sized company and equip your business with tools that will grow with you.**
